CORONAL AND STELLAR MASS EJECTIONS (IAU S226)

Cambridge University Press. Hardcover. Condition: New. 536 pages. Dimensions: 9.8in. x 6.6in. x 1.2in. The Sun and other stars eject large clouds of plasma and magnetic fields on a continual basis. They are accelerated to high speeds and then become capable of producing highly energetic charged particles and disrupting the magnetospheres of planets such as the Earth. This proceeding reflects recent attempts to understand these processes as well as how the magnetic evolution at the base of the corona can cause...
