ANALYSIS OF POWDER COMPACTION THROUGH EQUAL CHANNEL ANGULAR EXTRUSION

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | A parametric study | Equal Channel Angular Extrusion(ECAE) is a method of creating fine-grained materials through Severe Plastic Deformation. Recently it has been shown as a viable method of consolidating metallic powders for creating nano-crystalline materials. But, not much is understood about the process by which the compaction occurs. Due to this, it has been extremely difficult to control the deformation process in order to achieve grain morphologies in a repeatable manner....
